

# DESALINATION PLANT

MEMFILL

## Nova-Desal

MTPL provides high quality reusable & drinking water from saline water by using homemade hollow fibre membranes combined with conventional RO treatment. We expertise in offering customized process solutions to the customers as per their requirements.

### Benefits

- Reduction of TDS from >30,000 to 9000 ppm in the pre-treatment level
- Removal of Boron
- Low pressure drop
- Good after-sales service
- Consistent water quality
- High efficiency when compared with conventional membrane distillation plant
- High durability
- Minimal chemical cleaning
- Less-frequent RO membrane replacement

### Applications

- Sea water purification
- Bore well treatment
- Domestic and Industrial
- Electronics Industry
- Power Industry
- Marine Industry
